

# Foldable Road Blocker

**Foldable Road Blocker** is a portable rapid deployment barrier system specially designed to provide maximum level of security against unauthorized vehicle access.

Its light weight and foldable design allow easy transportation and fast deployment by single security personnel.

Suitable for emergency deployment, road block or temporary road closure at critical areas, such as governmental buildings, embassies, police stations, Royal Palaces, Military Bases and Airports.

Flexible and easy extension of barrier length to suit any road width or condition.

Proven crash test result testified its capability to withstand direct high impact forces of vehicles.
